AMMAR ALZAIEM

Damascus, Syria | ammaralzaiem@outlook.com | GitHub | LinkedIn | Credly | +963944408199

Information Engineering student focused on web application security and penetration testing, with hands-on experience in VAPT, reconnaissance, enumeration, vulnerability assessment, and HTTP/web security testing. Practical experience using Kali Linux, Burp Suite, and other security tools through structured internships and security labs. Currently building a practical portfolio through authorized labs, technical reports, and penetration-testing exercises.

EDUCATION

Arab International University — Bachelor in Information Engineering | *CGPA: 3.31* 2024 – 2029 (Expected)

- **Relevant Courses:** Operating Systems, Algorithms & Data Structures, Algorithms Analysis & Design, System Analysis and Design, Data Communication, Computer Networks

TECH50K — Cybersecurity Training Program Aug 2026 – Feb 2027

- Cybersecurity-focused practical training and evaluation program.
- Following a progressive learning path from technical fundamentals toward specialized cybersecurity skills.

EXPERIENCE

TriosCyber — VAPT Intern Sep 2026 – Oct 2026

- Completed 30 structured practical tasks covering reconnaissance, network scanning, enumeration, web testing, vulnerability assessment, manual validation, and professional reporting.
- Participated in 4 live technical sessions (8 hours total) covering VAPT methodology, OWASP Top 10, HTTP/web fundamentals, and manual testing.
- Used Nmap, Burp Suite, WhatWeb, Gobuster/FFUF, Nikto, Nuclei, Kali Linux, WHOIS, and DNS tools in authorized lab environments.

Secure Dev Labs — Red Team Fundamentals Intern Aug 2026 – Oct 2026

- Completed 4 practical security assessment tasks across Metasploitable2, DVWA, Windows XP, and a web application target.
- Performed reconnaissance, enumeration, vulnerability analysis, and controlled exploitation using Nmap, Nikto, enum4linux, SearchSploit, Metasploit, SQLmap, SSLyze, shodan and other security tools.
- Conducted a 16-step SQL injection assessment against DVWA, testing multiple SQLi techniques and demonstrating database and credential-data exposure.

SKILLS

- **Security:** Web Application Security, VAPT, Reconnaissance, Enumeration, Vulnerability Assessment, HTTP Security, SQL Injection, XSS, Access Control Testing
- **Tools:** Burp Suite, Nmap, Nikto, WhatWeb, Gobuster, FFUF, Nuclei, Metasploit, SQLmap, SSLyze, Wireshark
- **Programming/Scripting:** Bash, Python, C++, JavaScript, HTML/CSS
- **Systems & Networking:** Linux, Windows, TCP/IP, DNS, HTTP/HTTPS.

LANGUAGES

- Arabic (Native)
- English (Upper Intermediate, C1 on EFSET)
